EXPERIENCE

Arista Networks · Senior UX Designer May 2021 – Jun 2026

- Designed and shipped Event Categories and the Events Page Redesign for CloudVision, a categorization system and network health dashboard that operators use to reduce alert noise and triage network issues faster.
- Created and led user research and direct user testing sessions: Interview scripts, live prototyping sessions, A/B Testing.
- Led the data viz portion of the design system, keeping all charts and graphs consistent throughout the product. Worked with designers and a team of engineers to maintain and implement newly proposed visualization types.
- Effectively utilized Claude to improve and increase design output, from aligning on project direction across teams with project briefs and documents, to leading meetings and interviews with interactive wireframe and prototypes.

CycurlD · Lead Product Designer Aug 2019 – Jan 2021

- Owned end-to-end design of the Imme App, an identity verification platform that enabled businesses to onboard and verify customers without sharing identifiable data.
- Delivered high-fidelity prototypes in Figma, iterating closely with developers to ship within tight feasibility and timeline constraints.
- Worked closely with owners in defining user needs and company values to achieve a unifying sense of brand and identity.

Nokia · UX Design Intern Jan 2019 – Apr 2019

- Designed a dashboard and widget system that gave network operators per-neighborhood visibility into internet usage patterns.
- Built interactive prototypes using Sketch and Invision.
- Modernized legacy interfaces to align with current Nokia design guidelines and industry standards.

Sun Life Financial (HK) · UX Design Intern Sep 2017 – Apr 2018

- Reimagined Sun Life Hong Kong's digital experience, launching a new client app and website alongside a major service design initiative.
- Built interactive prototypes for the client app using Sketch and Invision for user testing sessions.
- Mapped client touchpoints and pain points through journey maps, service blueprints, and stakeholder interviews.
